

The following symbols indicate the various control options available for JDN equipment

for JDN Air Hoists

for JDN Air Winches

■ ROPE CONTROL

Suitable For Any Control Length:

This control type provides infinitely speed control for hoist lifting and lowering motions and is suitable for any required control length. The rope control option is available for all PROFI series hoists up to 25t carrying capacity. For larger capacity PROFI series hoists 37 TI, 50 TI and 100 TI the rope is replaced by a pull chain for greater strength.

■ LEVER CONTROL

For JDN Air Winches:

With the hand lever control, loads can be moved safely in a precise manner and at variable speeds. The direction of movement of the lever corresponds to the direction of rotation of the rope drum. When released, the lever returns automatically to the centre position.

■ FI-CONTROL

Sensitive control, for easy handling:

The FI-Control provides precise infinitely variable speed control and the ergonomically designed synthetic housing ensures comfortable handling for the operator. The use of corrosion resistant materials makes it suitable for use in aggressive atmospheres, with the control hoses enclosed in an outer sheath which protects them from external conditions.
