New JDN Low Headroom Trolley 25 ton Capacity & less than 30 inch Headroom!

CAD Model of the new JDN Low Headroom Trolley LMF25T

Wanted: A hoist with a carrying capacity of 25 Tons and a maximum headroom of 29.96 inches for installation and removal of valve heads.

JDN received the inquiry in December 2008. Due to the low headroom requirements the standard JDN EH-25 Monorail Hoist was not a possible solution for the job. Therefore we developed and delivered—in only nine weeks—this new Low Headroom Trolley based on our

Profi 10Ti. Once again JDN delivered a new standard—powered by air!

We are ready for your challenge—give us your special requirements! Call or email today 800-331-2889—sales@jdneuhaus.com

J.D. Neuhaus Industry Memberships

J.D. Neuhaus maintains memberships in various industry organizations. We consider this effort critical to our success. Through our active participation we are in the forefront as an industry leader in setting standards, keeping up with industry trends/changes, promoting safety and advancement of lifting technology.

International Association of Drilling Contractors (IADC) promotes a strict commitment to safety, the preservation of the environment and the advancement in drilling technology. IADC's resources offer diverse benefits to its membership of drilling contractors, producers and associates. Through conferences, training seminars and a comprehensive network of technical publications, IADC continually fosters education and communications within the upstream petroleum industry.

Associated Wire Rope Fabricators (AWRF) promotes interests common among companies manufacturing, fabricating or distributing lifting, rigging and load securement devices made of chain, rope and synthetic products. The association works to establish, acquire, preserve and disseminate various technical information, and encourages the development of safety standards and programs and product identification procedures. JDN is the proud recipients of an AWRF safety award.

Hoist Manufacturers Institute (HMI) members are the Industry's leading suppliers of hoisting equipment. HMI operates through committees with programs and policies reviewed and adopted by the membership with representation from each member company. Its activities include an active engineering committee. HMI is represented on a number of standards developing committees and actively supports the development and certification of safety standards by the ANSI consensus method.

Materials Handling Industry of America (MHIA) is the largest U.S. material handling & logistics association representing the leading providers of material handling and logistics solutions. MHIA provides educational, business development, networking and solution sourcing opportunities for its 800 member companies and for the larger community of manufacturing, distribution, logistics and supply chain professionals.
