### 6x 10TI Shipment

Recently JDN successfully shipped out six Profi 10TI air hoists. The units were lug mounted into motor driven trolleys and were able to meet the curved beam requirements of the plant's current structure. These hoists were equipped with long lift chain containers and 4 button pendants. The hoists were shipped to a power plant in the midwest as a new integrated system. JDN was able to meet and exceed all of the stringent safety requirements of this plant in regards to lifting equipment. For more information on our Profi line of hoists, available in capacities from 1/4 ton to 100 tons, visit [http://www.jdneuhaus.com/products\\_profi\\_us.htm](http://www.jdneuhaus.com/products_profi_us.htm)

### Low Headroom USA

Pictured to the right is the JDN Profi LMF 2TI. This is our two ton, low headroom hoist. With a 15.51" headroom it is second to none in quality and performance. We here at JDN understand the importance of special requirements, and the added stress this can cause when a hoist is needed. Therefore we keep low headroom units in stock for quick delivery. Our LF series includes capacities from 1/4 ton to 6 tons. More information on these JDN air hoists can be found at our website, please visit [http://www.jdneuhaus.com/products\\_trolleys\\_us.htm](http://www.jdneuhaus.com/products_trolleys_us.htm)

For custom solutions we offer an UH series hoist for ultra low headroom application. This series features custom engineered hoists to suit your particular need. They range from 2 ton to 12 tons. For example, the UH 4 has an unbelievably low headroom of 9.06". These hoists are made to order, please provide flange width when sending your orders.
